Ruth E. Randall, Commissioner of Education

This document was prepared by the staff of the Education Statistics Section.

Published by the Education Statistics Section, Minnesota Department of Education
737 Capitol Square, St. Paul, MN 55101

This is the twelfth annual report presenting selected data on enrollment, staff, and finance for each Minnesota school district. It is published by the Minnesota Department of Education. Three primary purposes have guided these reports, 1) to provide data which are often requested, 2) to present data in a manner which would facilitate inter-district and other comparisons, and 3) to establish and maintain a series of data which is highly comparable from year-to-year.

Explanation of Contents

Approximately two thirds of *Profiles* consists of tables containing thirty-eight separate statistics for each of Minnesota's public school districts, counties, Educational Cooperative Service Units (ECSUs), and the total state. The first 12 pages of the report are designed to explain the use of the tables. Pages 4 through 9 contain explanations of some of the important trends and patterns in elementary and secondary education, as contained in the report's statistics. Pages 10 through 12 contain definitions of the 38 statistics used in the tables. Pages 13 and 14 contain an alphabetic list of all school districts together with a state map to aid in locating the districts referenced in the tables.

The statistical tables begin on page 15. Pages 15 through 36 contain the 38 statistics for each of the 432 districts which offered an elementary and secondary education program during the 1983–84 school year. The districts are grouped by county, based on the location of the district office. The counties are listed in alphabetical order; districts are, in turn, alphabetized within counties.

The next set of tables, on pages 37 through 42 display county, region, and state totals of the 38 statistics.

Pages 43 and 44 contain two additional tables. The first lists the 38 statistics for five unique school districts — three which operate only elementary schools and two which do not directly operate any schools. The second table lists data item averages for ten enrollment size categories; this allows one to compare districts with those of similar size.

Finally, the summary statistics table on pages 45 and 46 displays a state total, highest and lowest values, median, and various percentiles for each of the 38 data items.

Notes on Financial Data

The expenditure data in this report are comparable to that contained in the three most recent *Profiles* reports. All districts report financial data on a computer-assisted system called UFARS (Uniform Financial Accounting and Reporting Standards). Table 1 shows the specific funds, programs, and objects included in each UFARS category; brief descriptions of the items included are contained on pages 11 and 12.

Some care should be exercised in making interdistrict comparisons of specific expenditure categories. While UFARS specifies the appropriate categories for various types of expenditures, some districts do incorrectly classify certain expenditures. It is not possible to catch all of these mistakes. Thus, although it is probably valid to make interdistrict comparisons of total operating expenditures, and state and local operating costs; interdistrict comparisons of the constituent categories may, in some instances, be misleading.

Interdistrict Cooperation

Prior to 1979 each school district was required to offer an educational program for each elementary and secondary grade. Legislation enacted in 1979 and 1983 altered this. Districts were now allowed to discontinue programs in certain grades and to enter into agreements with other school districts to provide programs for these grades. These "pairing" type agreements gave districts substantial latitude in determining how to provide services to their pupils. For example, one cooperating district could maintain a junior high school for both districts while the other would provide all senior high services. In 1983–84 cooperative agreements were in effect in the following 18 districts:

Kensington (#209) and Hoffman (#265)
Sioux Valley (#328) and Round Lake (#516)
Tyler(#409) and Russell (#418)
Marshall (#413) and Lynd (#415)
Halstad (#524) and Hendrum (#525)
Morgan (#636) and Franklin (#650)
Renville (#654) and Sacred Heart (#655)
Magnolia (#669) and Luverne (#670)
Echo (#893) and Wood Lake (#896)

These districts are included in this report. Additional caution must be exercised when comparing data, especially financial data, to data from non-paired districts; UFARS does not accommodate inter-district transfers in a manner which effectively allocates costs to pupils in inter-district cooperation situations.

Table 1

Sources of Expenditure Data for *School District Profiles*

This table is intended primarily for persons who are familiar with UFARS, and who wish to examine or verify the expenditure data for a specific school district.

Each of the 16 expenditure categories in *Profiles* includes all expenditures within a defined set of funds, programs, and objects, as defined in the upper section of the table below. The lower section of the table summarizes the funds, major program categories, and object categories used for *Profiles*.

For a further explanation of UFARS, and for definitions of specific funds, programs, and objects, see: Minnesota Department of Education, *Manual for the Uniform Financial Accounting and Reporting System for Minnesota Schools*.

Categories Used in the Report	Funds*	Programs**	Objects***
18. District and school administration	1 and 9	1-99	
19. District support services	1 and 9	100-199	
20. Regular instruction	1 and 9	200-299	
21. Vocational instruction	1 and 9	300-399	
22. Exceptional instruction	1 and 9	400-499	
23. Instructional support services	1 and 9	600-699	All objects
24. Pupil support services	1 and 9	700-799	except 500-
25. Operations and maintenance	1 and 9	800-899	599 and 910
26. Food service	2	All	
27. Pupil transportation	3	All	
28. Other operating programs	1 and 9	0, 500-599, and 900-999	
29. Total PK-12 operating expenditures (this is the total of categories 18 through 28)	1,2,3, & 9	All	
30. Community service	4	All	
31. Capital outlay	5	All	All but 910
	1,2,3, & 4	All	500-599
32. Building construction	6	All	All but 910
33. Debt service	7	All	All but 910

Funds*
1. General
2. Food Service
3. Pupil Transportation
4. Community Service
5. Capital Expenditure
6. Building Construction
7. Debt Service
9. Trust and Agency

Major Program Categories**
0 Districtwide (no specific program)
1-99 District and school administration
100-199 District support services
200-299 Regular instruction
300-399 Vocational instruction
400-499 Exceptional instruction
600-699 Instructional support services
700-799 Pupil support services
800-899 Sites, buildings, and equipment
900-999 Other programs

Objects***
500-599 Capital expenditures
910 Transfers to other funds

For More Information

Additional copies of School District Profiles, 1983–84 may be purchased from the Minnesota State Documents Center at 117 University Avenue, St. Paul, Minnesota 55155 (telephone 612/297-3000), or toll free in outstate Minnesota 1-800-652-9747.

If you have questions or comments about information in this report, or if you would like further information on related topics, please contact the Education Statistics Section.

This section examines trends for a selected group of statistics. It also describes and analyzes some of the variation which exists among school districts.

Number of Students

In 1983–84 resident average daily membership (ADM) of Minnesota public schools totaled 699,928. This was 10,753 fewer than in 1982–83 and continues the decline begun in the early '70s.

The ADM of individual school districts reflects Minnesota's heterogeneous demographic makeup, varying from Verdi's 86 ADM to the 37,395 ADM of the Minneapolis school district. Fifty-three percent of the state's ADM are located in the seven-county Twin Cities metropolitan area. Table 2 illustrates ADM variation in another manner by aggregating Minnesota's school districts into ten size groups each containing between 42 and 45 districts. From that table it is easy to observe that the largest ten percent of the state's school districts enroll more than half of its pupils.

Percent Minority

Possibly no other demographic characteristics of Minnesota school districts has changed more dramatically during the past decade than the percentage of minority pupils. Table 3 shows the percentage enrollment of minorities for years beginning in 1973–74. Between 1973–74 and 1983–84 this percentage more than doubled.

Table 2

1983–84 Resident Average Daily Membership (ADM) for Ten Enrollment Size Groups

Group Number	Size Range (1983–84 Resident ADM)	Number of Districts	Total Resident ADM	Percent of State Total
1.	0 to 234 students	45	8,503	1.2%
2.	235 to 309 students	43	10,420	1.5
3.	310 to 399 students	44	16,156	2.3
4.	400 to 494 students	44	18,229	2.6
5.	495 to 664 students	42	24,939	3.6
6.	665 to 859 students	42	33,159	4.7
7.	860 to 1149 students	42	44,738	6.4
8.	1150 to 1799 students	44	58,611	8.4
9.	1800 to 3699 students	43	109,823	15.7
10.	3700 or more students	43	375,388	53.6
	State Totals	**432**	**699,966**	**100.0%**

Although all groups shared in the gains, the increase in Asiatic enrollees was particularly dramatic — appoximately six-fold! This growth was almost wholly the result of the immigration of refugees from Southeast Asia following the Vietnam war.

Professional Staff

Table 4 shows the number of Minnesota professional staff, as well as pupil-staff ratios, for the past eight years. Total staff declined in all but one of these years. However, over much of this period, the decline in enrollments was proportionately greater. As a result, pupil-staff ratios improved (i.e., decreased). In 1982–83, school districts were caught in the middle of the state's financial crisis which resulted in dramatically reduced state funds. The total number of professional staff was reduced significantly and the pupil-staff ratio increased from 15.1 to 16.0. Professional staff declined again in 1983–84 but only modestly; the pupil-staff ratio improved slightly, from 16.0 to 15.9.

Table 3

Percent Minority Enrollment* 1973–74 through 1983–84

School Year	American Indian or Alaskan	Black	Asian	Hispanic	Total
1973–74	1.1%	1.3%	0.3%	0.5%	3.2%
1975–76	1.3%	1.5%	0.5%	0.6%	3.9%
1977–78	1.4%	1.6%	0.7%	0.6%	4.3%
1979–80	1.5%	1.9%	0.9%	0.7%	5.0%
1981–82	1.5%	2.1%	1.8%	0.7%	6.1%
1983–84	1.6%	2.3%	1.9%	0.8%	6.6%

*Based on enrollment on October 1 of the school year indicated.

Table 4

State Totals* of Professional Staff and Pupil-Staff Ratio, 1976–77 through 1983–84

School Year	Total Professional Staff	Pupil-Staff Ratio
1976–77	50,898	16.9
1977–78	49,995	16.7
1978–79	49,723	16.2
1979–80	49,391	15.7
1980–81	49,444	15.2
1981–82	48,236	15.1
1982–83	44,553	16.0
1983–84	44,044	15.9

*These totals include all elementary-secondary staff of the 432 districts listed in the tables on pages 15 through 36.

Figure 1

Average Pupil-Staff Ratios, 1983–84
For Ten Enrollment Size Groups

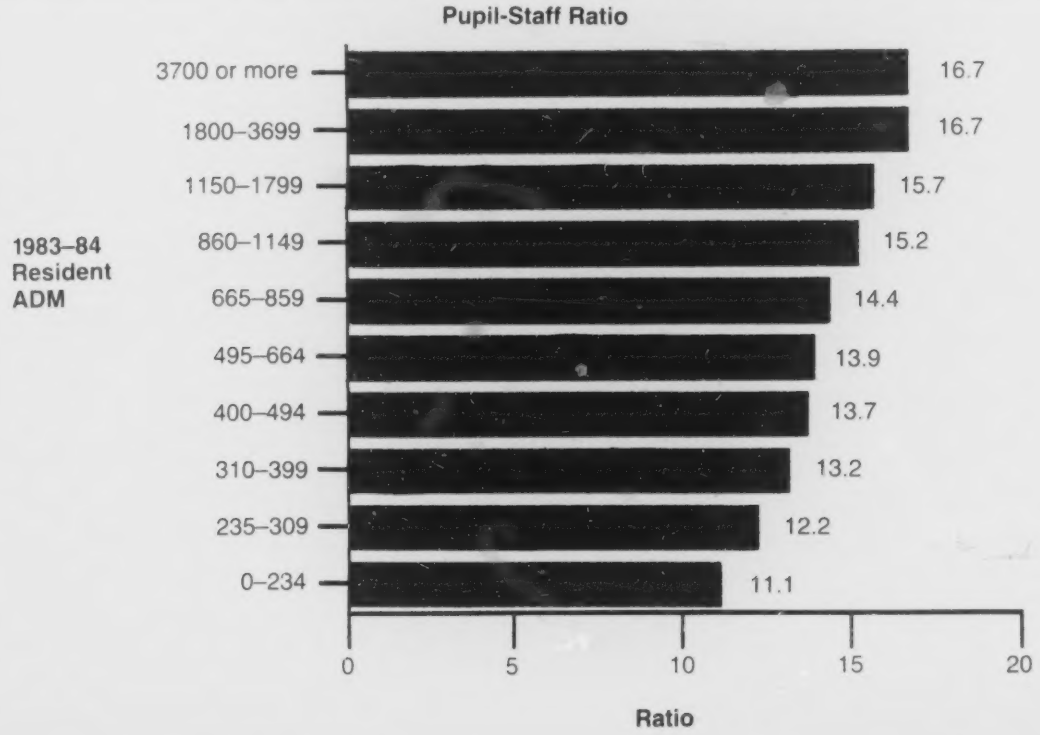

Figure 1 indicates that the average pupil-staff ratio varies significantly according to the enrollment size of school districts. Smaller districts tend to have fewer pupils per staff member than do larger districts. This relationship probably reflects economies of scale available to larger districts.

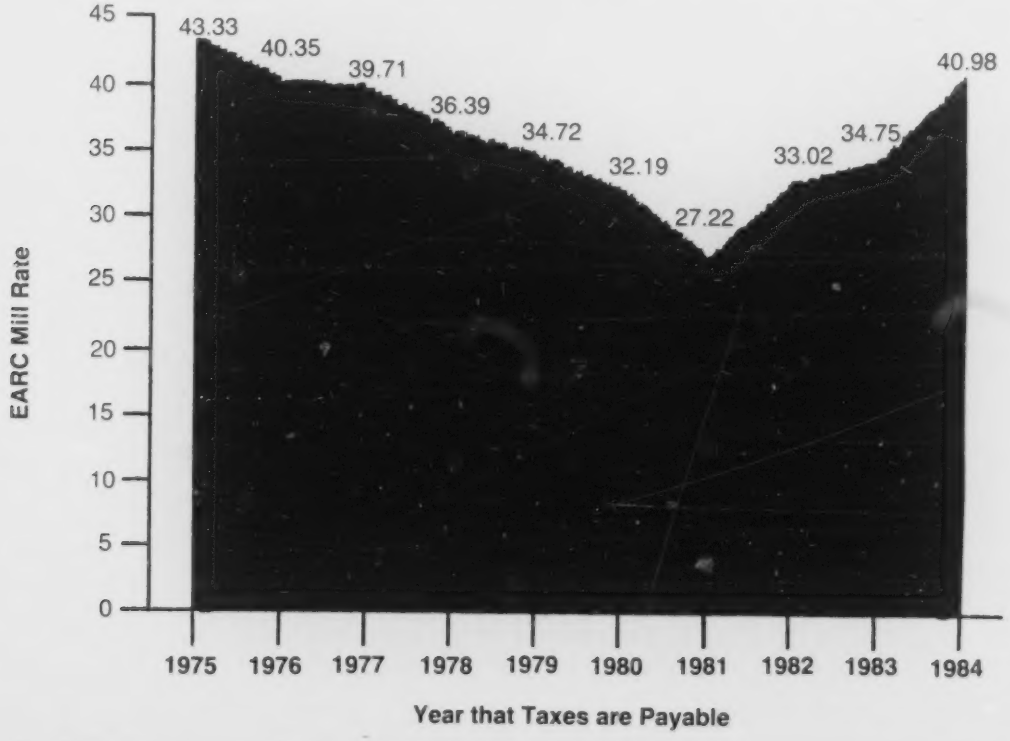
Tax Rates

Figure 2 shows how average school property tax rates have changed during the past decade. After six years of declines, they began a dramatic increase. In the three years since 1981, they have increased by 13.76 mills — a nearly 51 percent jump. These increases are the result of two factors, 1) state funding formula changes which permitted school districts to levy more, and 2) increases in the number of districts which passed referendum levies.

Figure 2

Minnesota School Tax Rates
State Totals, in EARC Mills



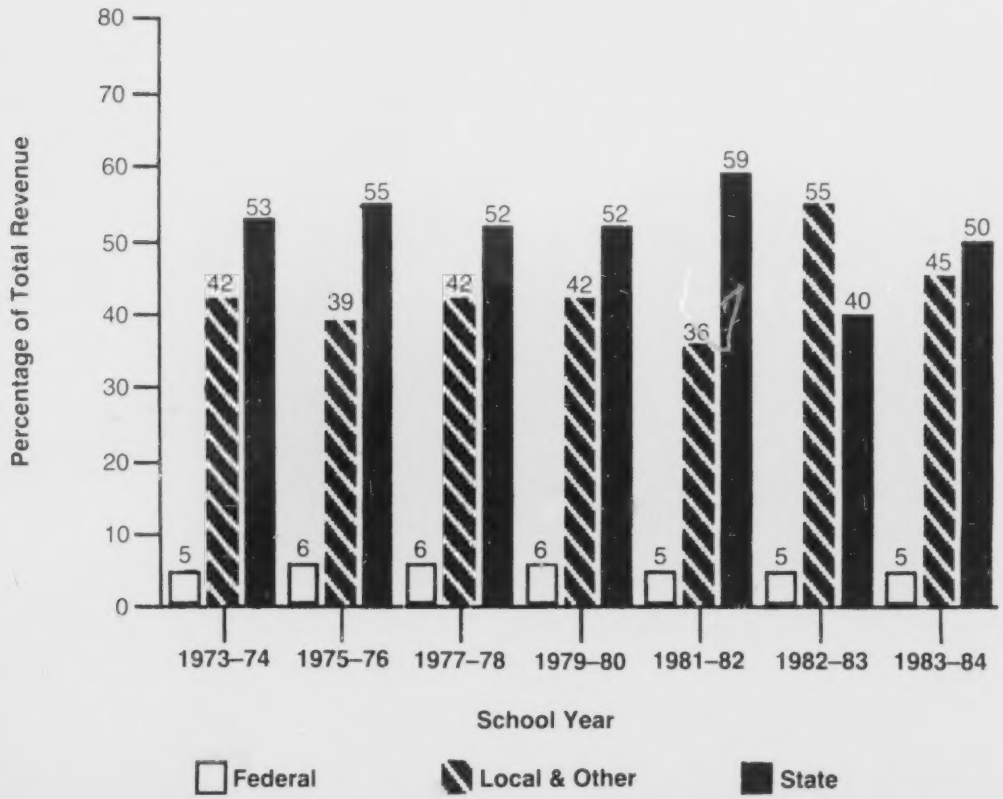
Sources of Revenue

Minnesota school districts receive funds from three sources — the federal government, the state, and from local property taxes. The proportion of monies received from these three sources varies significantly from district-to-district. In the case of state and local sources the proportions are determined by a complex formula which takes into account each district's property wealth as well as its willingness to tax itself.

For 1983–84 Minnesota districts as a whole received 50 percent of their revenue from the state, 45 percent from local sources and, 5 percent from the Federal Government. Figure 3 indicates that during the '70s the state/local/federal percentages remained fairly constant at approximately 53/42/5, respectively. For 1981–82, the state assumed an even greater portion of the funding. However, due to legislation enacted to resolve the state's financial crisis, school district revenue coming from state sources dropped from 59 percent for 1981–82 to only 40 percent for 1982–83. For 1983–84 state funding levels again became predominant although not attaining pre-recession levels.

Figure 3

Sources of Minnesota School District Revenues 1973–74 through 1983–84



Operating Exenditures

Total PK–12 operating expenditures per pupil unit increased by 7.8 percent between 1982–83 and 1983–84. This compares with an increase of only 5.6 percent between 1981–82 and 1982–83.

Table 5 shows the percentage of operating expenditures spent for various programs and services during the past two years. It is readily apparent that the percentages varied little between the two years. The proportions of monies spent on administration decreased slightly while instructional expenditures grew. These trends were also observable when comparing 1981–82 and 1982–83.* Within instruction the percentage of expenditures spent for exceptional instruction continues its long-term growth; educational services for children with special needs is mandated in both state and federal laws.

Operating Fund Balances

Table 6 indicates that for the first time since 1979–80, Minnesota school districts, as a whole, improved their financial position; revenue in the four operating funds exceeded expenditures. In spite of this significant improvement, 154 districts experienced a worsened position. However, only 37 districts had a negative operating funds balance at the end of the 1983–84 school year.

*Table 4 of *School District Profiles 1982–83*, Minnesota Department of Education, August 1984.

Property Valuation

The value of taxable property, per pupil, varies widely within Minnesota. Humboldt-St. Vincent can levy property taxes against $135,576 of EARC valuation per pupil unit, whereas Red Lake has only $155 of EARC valuation per pupil unit. This pattern of very large differences are typical throughout the nation and have provided the driving force behind the reforms of the '70s and '80s designed to change the manner in which states finance public education. Minnesota has been considered a leader in efforts to compensate ("equalize") school districts for differences in property wealth.

Table 5

State Averages of PK–12 Operating Expenditures per Pupil Unit, 1982–83 through 1983–84

Category	1982–83 Expenditures	1982–83 % of Total	1983–84 Expenditures	1983–84 % of Total
18. District and school administration	$ 148	6.2	$ 153	5.9
19. District support services	59	2.5	66	2.6
Subtotal, Administration	$ 207	8.7	$ 219	8.5
20. Regular instruction	$1074	44.7	$1159	44.8
21. Vocational instruction	56	2.3	63	2.4
22. Exceptional instruction	247	10.3	272	10.5
23. Instructional support services	75	3.1	82	3.2
Subtotal, Instruction	$1452	60.4	$1576	60.9
24. Pupil support services	$ 60	2.5	$ 62	2.4
26. Food service	121	5.0	129	5.0
27. Pupil transportation	172	7.2	183	7.1
Subtotal, Other student services	$ 353	14.7	$ 374	14.5
25. Operations and maintenance	$ 252	10.5	$ 273	10.5
28. Other operating programs	$ 137	5.7	$ 146	5.6
Total PK–12 operating expenditures	**$2402**	**100.0**	**$2589**	**100.0**

Table 6

State Average of Change in Operating Funds Balance, per Pupil Unit 1976–77 to 1983–84

School Year	Change in Funds Balance, per Pupil Unit
1976–77	+ $ 3
1977–78	+ 47
1978–79	+ 50
1979–80	+ 54
1980–81	− 8
1981–82	− 27
1982–83	− 13
1983–84	+ 76

School District Name	District Number	1983–84 Resident Average Daily Membership					Pupil Data			Professional Staff		Tax Rates		Pupil Units (Weighted ADM)	
		1 Pre-Kindergarten Handicapped	2 Kindergarten	3 Elementary (Grades 1-6)	4 Secondary (Grades 7-12)	5 Total (Pre-K thru Grade 12)	6 Percent Minority	7 Percent Attendance	8 Percent Transported	9 Total Staff (FTE)	10 Pupil-Staff Ratio	11 Auditor Mills	12 EARC Mills	13 Resident Pupil Units	14 Total Pupil Units

The tables on pages 15 through 41 contain 38 separate statistics for each school district, county, and region in the state. Definitions of these 38 statistics are given below. All data are for the 1983–84 school year.[1]

1983–84 Resident Average Daily Membership

Average daily membership (ADM) is the average number of pupils in membership during the school year. Pupils need not be *in attendance* to be counted in ADM, but they must be *in membership* (i.e., currently enrolled in the district). For example, a pupil who is enrolled for the entire school year counts as 1.0 ADM; a pupil who is enrolled for exactly half the school year counts as 0.5 ADM.

The ADM counts in this report are, more specifically, counts of *total resident ADM*. They include all district residents who were enrolled in their home district, plus residents who were educated in other districts and for whom the home district paid tuition. Resident ADM counts are used in calculating foundation aid payments and property tax levy limitations. Resident membership includes:

1. **Prekindergarten Handicapped** — ADM of prekindergarten students enrolled in special education programs.
2. **Kindergarten** — ADM of students enrolled in kindergarten classes.
3. **Elementary, Grades 1–6** — ADM of students enrolled in grades 1–6, including students in elementary-level ungraded and special education classes.
4. **Secondary, Grades 7–12** — ADM of students enrolled in grades 7–12, including students in secondary-level ungraded and special education classes.
5. **Total** — Total ADM of all district residents, prekindergarten through grade 12; this is the total of columns 1 through 4.

Pupil Data

6. **Percent Minority** — The percentage of the district's students who are of American Indian, Alaskan, Black, Asian, or Hispanic origin.
7. **Percent Attendance** — The average ratio of days attended to days enrolled, for all students in the district.
8. **Percent Transported** — The number of public school students transported to and from school twenty or more days, as a percentage of the district's total enrollment.[2]

Professional Staff

These statistics provide information about each district's professional staff. Staff are counted in full time equivalents (FTE). For example, a full time staff member is counted as 1.0 FTE; one employed only half time is counted as 0.5 FTE. Staff counts include only elementary-secondary personnel; post-secondary personnel are excluded.

9. **Total Staff FTE** — The total number of licensed professional staff employed by the district, measured in full time equivalents (FTE). This count includes administrators, classroom teachers, and all other licensed professional personnel.
10. **Pupil-Staff Ratio** — The average daily membership of all students (both residents and nonresidents) who were enrolled in the school district, divided by the number of professional staff (column 9).

Tax Rates

These figures show the tax rates, expressed in mills, for school district property taxes payable in 1984. Taxes payable in 1984 provide revenue for the 1984–85 school year.

11. **Auditor Mills** — The actual school district tax rate, as determined by the county auditor. If the auditor tax rate is 50 mills, then a property owner would be taxed $50 for each $1,000 of assessed value. Because of differences in local property assessment practices, comparisons of auditor tax rates among districts may not be meaningful.
12. **EARC Mills**[3] — This tax rate is computed by multiplying the district's auditor tax rate times the 1983 market sales ratio. The market sales ratio is the ratio of the market value as determined by local assessors, to the actual selling price of the property. Market sales ratios are compiled by the Minnesota Department of Revenue EARC Sales Ratio Unit.

    EARC tax rates are computed to compensate for differences in assessment practices. Thus when comparing the level of gross tax burden in various districts, these rates provide a better comparison than auditor tax rates.

School District Name	District Number	1983–84 Resident Average Daily Membership					Pupil Data			Professional Staff		Tax Rates		Pupil Units (Weighted ADM)	
		1. Pre-Kindergarten Handicapped	2. Kindergarten	3. Elementary (Grades 1-6)	4. Secondary (Grades 7-12)	5. Total (Pre-K thru Grade 12)	6. Percent Minority	7. Percent Attendance	8. Percent Transported	9. Total Staff (FTE)	10. Pupil Staff Ratio	11. Author Mills	12. E.ARC Mills	13. Resident Pupil Units	14. Total Pupil Units

Pupil Units (Weighted ADM)

13. **Resident Pupil Units** — This figure is computed by applying weightings to the district's resident average daily membership (ADM), which is shown in columns 1 through 5. Each kindergarten ADM counts as 0.5 pupil units; each prekindergarten, kindergarten handicapped, and elementary ADM counts as 1.0 pupil unit; and each secondary ADM counts as 1.4 pupil units. Resident pupil units are used in calculating the district's state foundation aid payments and property tax levy limitations.
14. **Total Pupil Units** — This figure includes the district's resident pupil units (column 13) plus the weighted ADM of two other groups of students: 1) students who reside in other districts but are enrolled in this district[4], and 2) nonpublic school students who attend the public school part-time for specific classes or services.

Revenue Percentages

These three columns show the percentage of each district's revenues from the federal government, the state government, and local and other sources. The percentages are based on all 1983–84 revenue reported by each district, except for proceeds from sales of real property and equipment, insurance recoveries, sales of bonds, loans, and interfund transfers.

15. **Federal** — The percentage of revenues from the federal government, whether paid directly or through another governmental unit.
16. **State** — The percentage of revenues from the Minnesota State government, including foundation aid, property tax credits that are paid to the school district, and all other state payments to school districts.
17. **Local and Other** — The percentage of revenues from local and other sources. This category includes revenues from property taxes, interest, rent, gifts, tuition and fees, sales of assets other than real property and equipment, payments from other school districts, and all other sources exept for federal and state government.

1983–84 Expenditures Per Pupil Unit

Columns 18 through 33 show each district's 1983–84 expenditures in sixteen different categories, divided by total pupils units (column 14). Columns 18 through 30 include all expenditures for the indicated purpose, except capital expenditures.

18. **District and School Administration** — Expenditures for the school board and for the office of the superintendent, principals, and any other line administrators who supervise staff.
19. **District Support Services** — Expenditures for central office administration which are not directly related to instruction, pupil support (see #24), or community services (see #30). Examples include expenditures for business services, data processing, legal services, personnel office, printing and the school census.
20. **Regular Instruction** — Expenditures for elementary and secondary classroom instruction, not including vocational instruction (#21) and exceptional instruction (#22), and for cocurricular and extracurricular activities. Examples include salaries of teachers, classroom aides, and coaches, and expenditures for classroom supplies and textbooks.
21. **Vocational Instruction** — Expenditures in secondary schools for instruction that is related to job skills and career exploration. Examples include expenditures for home economics, industrial, business, agriculture, and distributive education.
22. **Exceptional Instruction** — Expenditures for instruction of students who, because of atypical characteristics or conditions, are provided educational programs that are different from regular instructional programs. Examples include expenditures for special instruction of students who are emotionally or psychologically handicapped, gifted and talented, or mentally retarded; for students with physical, hearing, speech, and visual impairments; and for students with special learning and behavior problems.
23. **Instructional Support Services** — Expenditures for activities intended to help teachers provide instruction, not including expenditures for principals or superintendents. Examples include expenditures for assistant principals, curriculum development, libraries, media centers, audio-visual support, staff development, and computer assisted instruction.
24. **Pupil Support Services** — Expenditures for all non-instructional services provided to students, not including transportation and food. Examples include expenditures for counseling, guidance, health services, psychological services, and attendance and social work services.
25. **Operations and Maintenance** — Expenditures for operation, maintenance, and repair of the district's buildings, grounds, and equipment. Examples include expenditures for custodians, fuel for buildings, electricity, telephones, and repairs.
26. **Food Service** — Expenditures for the preparation and serving of meals and snacks to students.
27. **Pupil Transportation** — Expenditures for transportation of students, including salaries, contracted services, fuel for buses, and other expenditures.

	Revenue %			1983–84 Expenditures per Pupil Unit															Other Measures per Pupil Unit				
	15 Federal	16 State	17 Local and Other	18 District and School Admin.	19 District Support Services	20 Regular Instruction	21 Vocational Instruction	22 Exceptional Instruction	23 Instructional Support Services	24 Pupil Support Services	25 Operation and Maintenance	26 Food Service	27 Pupil Transportation	28 Other Oper. Programs	29 Total PK-12 Operating Expenditures	30 Community Service	31 Capital Outlay	32 Building Construction	33 Debt Service	34 Operating Funds Balance	35 Change in Funds Balance	36 State and Local Oper. Costs	37 Long Term Debt	38 1983 EARC Value

28. **Other Operating Programs**[5] — Includes all operating expenditures that were not charged to any other category (columns 18–27).
29. **Total PK–12 Operating Expenditures** — The total of the eleven preceding categories of expenditures (columns 18 through 28). This figure includes all expenditures incurred for the benefit of elementary and secondary education during the 1983–84 school year, except capital and debt service expenditures.
30. **Community Service** — Expenditures for recreation, civic activities, adult education, early childhood education, or similar programs which are not conducted primarily for elementary and secondary students, and for noncredit summer school programs.
31. **Capital Outlay** — All expenditures for acquisition or replacement of assets that have benefits for more than one year, except expenditures for construction of new buildings and additions (see #32). Includes expenditures for purchase of land and equipment, for remodeling and improvements to existing buildings, and for leasing of equipment and buildings.
32. **Building Construction** — Expenditures for construction of new buildings and additions, including payments to contractors, costs of advertising for contracts, architects' and engineers' fees, costs of equipping new buildings, and all other related costs.
33. **Debt Service** — Expenditures for repayment of long term debt (see #37), including payments of principal and interest on bonds and state loans.

Other Measures Per Pupil Unit

34. **Operating Funds Balance** — This figure is a measure of the district's financial condition at the end of the 1983–84 school year, and of how much resources are available to be used in future years. It is equal to the sum of the unappropriated balances on June 30, 1984, from the four operating funds (general, food service, pupil transportation, and community service funds), excluding the amount of statutory operating debt, plus the appropriated fund balance for current use of taconite payments; this balance is then divided by 1983–84 resident pupil units (column 13).
35. **Change in Funds Balance** — The difference between the district's operating funds balance on June 30, 1984 (see #34 above) and on June 30, 1983, divided by 1983–84 resident pupil units. This is essentially equal to the difference between the district's 1983–84 revenues and expenditures, for the four operating funds combined. Thus a negative number indicates that the district's expenditures in the operating funds were greater than its revenues.
36. **State and Local Operating Costs** — This figure, also called adjusted maintenance cost, is often used to compare overall costs of education among districts. It is essentially the net cost per pupil unit of education that is financed through state and local funds. It is computed as follows:

    Sum of all expenditures for current operation of the schools (doesn't include expenditures for transportation, community services, capital outlay, building construction or debt service).
    Minus all revenue from the federal government.
    Minus revenue from sale of food and materials.
    Minus admission fees and gate receipts from school activities. This total is then divided by 1983–84 total pupil units (column 14).

37. **Long Term Debt** — The amount of long term debt outstanding on June 30, 1984, divided by 1983–84 resident pupil units. Long term debt includes general obligation bonds and capital and debt service loans from the state.
38. **1983 EARC Value** — The 1983 adjusted assessed valuation of the district, as published by the Equalization Aid Review Committee (EARC), divided by 1983–84 resident pupil units. This figure is an indicator of the district's ability to raise revenue through local property taxes.

Footnotes

1. There are three exceptions to this general rule. The two tax rate statistics (columns 11 and 12) are for taxes payable in calendar year 1984; these taxes will provide revenue for the 1984–85 school year. The EARC value (column 38) is based on property values in 1983; this figure will be used in computing state aids and tax levy limitations for the 1985–86 school year.
2. For some school districts and some categories of students, the counts of students transported were estimated for column 8.
3. For districts in the Twin Cities area which are members of a special intermediate vocational-technical district (districts 287, 916, and 917), the EARC mill rate shown in column 12 includes a small additional tax rate for the special intermediate district.
4. In computing total pupil units, students who are residents of one school district but attend school in another district are counted in both districts, if the resident district pays tuition to the district attended. In 1983–84 there were 7,850 students (4,820 pupil units) in this category. Thus the state total of pupil units in column 14 of this report includes some double counting. This measure of pupil units is used because it provides the most valid comparison with expenditures. If these students were counted only in their resident district or only in the district attended, the expenditures per pupil unit would be inaccurate in the other district.
5. Some school districts included all expenditures for employee benefits in the same UFARS programs as the employees' salaries. Thus, for example, health insurance for the superintendent is included with "district and school administration" (column 18), and benefits for teachers are included with instructional programs (columns 20, 21 and 22). Other districts reported all expenditures for employee benefits separately; for these districts, the expenditures show up in "other operating programs" (column 28). Because of this difference in accounting practices there is wide variation in the amounts reported in column 28.

The figures listed on the next six pages are, for each county, totals for all school districts which have their central offices in the county. Totals are also listed for the state's thirteen development regions and for the entire state. Counties are listed by region, with the regions in numerical order. The map on page 14 shows region and county boundaries.

boundaries of the ECSU regions are the same as the boundaries of the development regions (see map on page 14), with the following exceptions: ECSU region 1 contains development regions 1 and 2. ECSU region 6 contains development regions 6E, 6W, and 8, and ECSU region 7 contains development regions 7E and 7W.

The tables below list totals or averages for all districts in each of ten enrollment size groups, based on 1983–84 resident average daily membership (ADM). For example, group 1 includes all districts with 234 or fewer ADM, and group 2 includes all districts with 235 to 309 ADM. Each group includes approximately ten percent of the state's school districts (i.e., 42 to 45 districts).

Unlike the other 432 districts listed in this report, the five districts in the table below do not directly operate both elementary and secondary schools. The first three districts (Nett Lake, in St. Louis County; Pine Point, in Becker County; and Winsted, in McLeod County) operate elementary schools, but their secondary students are transported to other districts.

The other two districts (Franconia, in Chisago County; and Prinsburg, in Kandiyohi County) directly operate no schools, but contract with other districts for the education of their resident students.

Because of their unique structures and functions, it may be misleading to compare these districts to the elementary-secondary districts in this report. Data for these five districts are not included in the Summary Statistics Table or in the county, region, and state totals.

The chief purpose of this table is to permit easy comparisons of districts with similar enrollment. For example, a superintendent in a district with 600 pupils may want to examine the totals for group 5 (495 to 664 ADM), to see how his/her expenditures compare with other districts that are about the same size.

The table below lists a variety of summary statistics for each of the 38 variables included in this report. The attendant definitions explain the meaning of these statistics.

This table may be used to better understand the distribution of a particular variable among Minnesota school districts. For example, percent attendance (column 7) varies little among districts, from a low of 84.6 to a high of 98.6. Ninety percent of the school districts are within the narrow range of 93.8 (5th percentile) to 96.7 (95th percentile). By contrast, percent transported (column 8) varies greatly, from a low of 9 to a high of 100.

The table may also be used to see how an individual school district compares with other districts in the state. Three examples illustrate this use of the data.

1. A district which has total PK–12 operating expenditures (column 29) of $2,500 per pupil unit is very near the median value, which is $2,520. Thus, about half the districts in the state have lower expenditures and half have higher expenditures.
2. A district with a pupil-staff ratio (column 10) of 6.6 could see from this table that they have the lowest pupil-staff ratio in the state.
3. A district with total average daily membership (column 5) of 320 students is between the 20th and 25th percentiles for this variable. Somewhere between 20 and 25 percent of Minnesota school districts have fewer students than this district.

		1983–84 Resident Average Daily Membership					Pupil Data			Professional Staff		Tax Rates		Pupil Units (Weighted ADM)

Definitions

Lowest Value — For any specific variable, the lowest value of that variable among all 432 school districts. For example, the lowest EARC mill rate (column 12) for a Minnesota school district is 19.49 mills. The table also shows the highest value for each variable.

XXth percentile — For any specific variable, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile for total staff (column 9) is 20; this means that approximately 10 percent of the school districts have fewer than 20 staff members, and 90 percent of the districts have more than 20 staff. The 25th and 75th percentile are also called quartiles; the 10th, 20th, 30th, ... through 90th percentiles are also called deciles.

Median — For any specific variable, a value chosen such that half of the school districts are below the chosen value, and half are above. For example, the median number of resident pupil units (column 13) is 754. This means that half the school districts have fewer than 754 resident pupil units, and half have more than 754.

State Total — For variables 1–5 (1983–84 resident average daily membership), 9 (total staff), and 13–14 (pupil units), the state total is simply the sum of the corresponding value for all 432 districts listed in the report. For all other variables, the state total is computed as the sum of the numerators for all districts, divided by the sum of the denominators. For example,

$$\text{State total pupil-staff ratio} \quad \frac{\text{State total of pupils}}{\text{State total of staff}}$$

For these variables, the state total is a form of weighted average.
